

Anti-shock Patent

We have a solely-owned “Anti-shock Patent” device which can be installed between the water heater and the pipeline so as to greatly increase the resistance between them. In this way, the shock hurt caused by the electricity coming from the unusually electrified tank to the pipelines can be avoided.

Patent No.
200520017507.4

Item	Value	Remark
Voltage for Testing (Household use)	220V	
Designed Resistance of Anti-shock Patent	300KΩ	
Measured Resistance of Anti-shock Patent	350KΩ	
Designed Amperage of Human Contact	0.85mA	≤5mA
Measured Amperage of Human Contact	0.81mA	≤5mA
